Re: Amended food-use authorization for all finfish treated with hydrogen peroxide

Dear Dr. Erdahl:

You are authorized 10 million finfish for human and animal food use. Edible tissues derived from experimental animals treated under the conditions described in this letter may be marketed for human consumption, for use in animal feeds, or released into public waters for possible human consumption. This authorization is in response to your submission dated April 27, 2015. This amended authorization for the use of 35% PEROX-AID (hydrogen peroxide) in all finfish species is consistent with the public health. Previous authorizations are superseded.

AMENDED FOOD-USE AUTHORIZATION

<b>DRUG IDENTITY/FEED INGREDIENT IDENTITY</b>	35% PEROX-AID (hydrogen peroxide)
Dosage Form	Liquid solution
<b>SPECIES</b>	Finfish
Class	All life stages
Number of Animals	10 million

<b>PERMITTED DOSING REGIMEN</b> Maximum Dose (or range) and Frequency and Duration of Dosing	Freshwater and Saltwater – up to 150 mg hydrogen peroxide/L for 30 minutes for up to 3 consecutive or alternating days <u>or</u> up to 100 mg hydrogen peroxide/L for 60 minutes for up to 3 consecutive or alternating days. If treatments at lower doses are ineffective, treat with up to 200 mg hydrogen peroxide/L for 30 minutes for up to 3 consecutive or alternating days.  Saltwater Sea Cages – up to 400 mg hydrogen peroxide/L for 45 minutes once per week for saltwater fish in open-water sea cages
Route of Administration	Immersion
<b>MINIMUM INVESTIGATIONAL WITHDRAWAL PERIOD</b>	Zero days
<b>OTHER RESTRICTIONS OR CONDITIONS</b>	None

This food-use authorization only applies to the treatment regimens stated above. Any change in the dosage regimen or the combining of this treatment with any other drug will require a separate food-use authorization. Drugs given to control animals must be administered in full compliance with the currently approved use. Your investigators should be made aware of their responsibilities under 21 CFR 511.1(b)(7)(ii) and (c)(1).

In addition, we remind you that a sponsor must submit specific information prior to each shipment or other delivery of the drug for clinical investigation in animals (see 21 CFR 511.1(b)(4)). You may file the notice of the drug shipment electronically to the Center for Veterinary Medicine (CVM) using FDA's eSubmitter tool. Please refer to the Center's electronic submission information on the CVM website at <http://www.fda.gov/AnimalVeterinary/DevelopmentApprovalProcess/ElectronicSubmissions/default.htm>. Alternatively, you can send one copy of the completed form to CVM. Furthermore, we note that clinical tests conducted under the provisions of this letter do not exempt investigational animals and their products from compliance with any other applicable inspection requirements (see 21 CFR 511.1(b)(5)(iii)).

#### INVESTIGATIONAL LABELING

The appropriate investigational labeling required under 511.1(a) or (b) must be affixed to your investigational drug product before shipping your drug product for studies conducted under 21 CFR 511.1(a) or (b), respectively. Affix the investigational label to each individual drug container.

#### COUNTING NUMBERS OF FISH

You should note that this authorization is for a specific number of fish. You should begin counting the number of fish used from the date you receive our letter starting at zero. Previous authorizations are superseded.

Please provide the total number of fish used towards this authorization in your annual reports. We remind you that a fish treated more than once still only counts as a single fish toward the authorization.

Additional numbers of fish may be requested in the future. A request for additional fish should be made with sufficient lead time to allow us to process an amended authorization.

#### ANNUAL REPORTS

We remind you of the continued necessity to provide annual reports under the FDA/CVM Aquaculture Workload Plan. Your annual report should include: a) a brief summary of the past year's activities and accomplishments in each of the INAD technical sections; b) certification of accountability of all drugs shipped under the INAD, records maintenance for FDA inspection, and compliance with the provisions of 21 CFR Part 511, including notification of adverse effects relative to humans, target animals, or the environment resulting from the use of the investigational drug; c) a list of all investigators, facilities, and species treated; and d) a copy of the current study protocol(s) noting any modification or revision. We recommend that any changes to pivotal study protocols be reviewed by CVM prior to initiating further investigations.

#### ADDITIONAL COMMENTS

1. In order for us to complete our files, the disposition of all investigational animals and unused drugs must be reported to this office. Please refer to this letter by date and INAD number when reporting the details of clinical investigations or the disposition of investigational animals.
2. Promptly report to this office any adverse reactions that may suggest significant safety hazards.
3. You should obtain a safety data sheet (SDS) for the investigational drug and follow the information in the SDS to protect all individuals who may be exposed to the investigational drug.

If you submit correspondence relating to this letter, you should reference the date and the principal submission identifier. If you have any questions or comments, please contact Dr. Cindy Burnsteel, Director, Division of Therapeutic Drugs for Food Animals, at 240-402-0817.

Sincerely,
